

# **Patient Innovation Platform(Portugal)**

(Patients as Partners in Healthcare Innovation)

**Samriddhi Bhandari**

**Roll no. 12**

# Table of Contents

- Patient Innovation
- Patient Innovation Platform(Portugal)
- Origin and Development
- Benefits and Impact
- Challenges and future scope

# Patient Innovation

- A powerful new ecosystem that transforms "lived experience" into viable, scalable, and entrepreneurial healthcare solutions.
- Patient innovation means solutions created by patients and caregivers
- Portugal is a pioneer in patient-led health innovation
- Focus on real-life health challenges

# **Patient Innovation Platform (Portugal)**

- An international, multilingual, non-profit online platform.
- Online platform to share patient-created solutions
- Open-access and community-based
- Innovations range from simple adaptations to complex devices or strategies.

# Origin and Development

- Started as an academic research initiative in Portugal.
- Led by Portuguese researchers from Católica Lisbon School of Business & Economics.
- Developed in collaboration with MIT and the Carnegie Mellon Portugal Program.
- Launched on February 7, 2014, in Lisbon.
- Supported by major research funders like FCT and the Peter Pribilla Foundation.

# Benefits and Impact

- Empowers patients and caregivers to actively participate in healthcare innovation.
- Improves quality of life through practical, user-created solutions.
- Encourages knowledge sharing and collaboration across countries.
- Supports cost-effective and need-based innovations.
- Enhances Portugal's global reputation in patient-led health innovation.

# Challenges and Future Scope

- Ensuring safety, validation, and ethical approval of patient-developed solutions.
- Limited awareness and digital access among patients and caregivers.
- Challenges in long-term funding and sustainability.
- Future scope for stronger collaboration with healthcare systems and policymakers.
- Potential to expand globally using digital technologies and AI.
