

SMART-ID ESTONIA

PRESENTED BY

NAME: AASTHA YADAV

ROLL NO:08

INTRODUCTION

- Smart- ID is an electronic authentication tool developed by SKID solutions, an estonian company.
- Users can log into various electronic services and sign documents with an electronic signature.
- It is released on November 2016. It is operating in Android, iOS, ipadOS, watchOS and available in 8 language.
- It works with internal connection only (no SIM card needed).
- Alternative to ID card/ Mobile ID for authentication and signing.

HOW IT WORKS

- Download the smart ID app(App store/ Google play)
- Register the account using your identity (ID card or Mobile ID)
- Use PIN 1 to log in and PIN 2 to sign documents
- The PIN 1 code must be four digits long
- The PIN 2 code must be five digits long
- A smart ID account is valid for three years

KEY BENEFITS

- Secure and convenient- no special hardware needed
- Cross country usage across the Baltic states(Latvia, Lithuania and Estonia)
- Qualified electronic signatures with legal validity across the EU
- Works with e-government, banking, healthcare and other services

SMART ID IN ESTONIA DIGITAL ECOSYSTEM

- Part of estonia broader digital identity infrastructure alongside ID card and Mobile ID
- Nearly 800000 Estonians use smart ID for daily authenticated access and signing
- Recently approved for use in e- voting authentication in elections

EXAMPLES OF USE

- Log in to online banking and governments portals
- Submit tax returns or check e- services
- Sign legal documents digitally
- Access healthcare, business and public services
